# LEARN TO DRAW
SEAVER!

**1.** First, draw yourself a nice, light circle. This will help you determine the size of Seaver's head.

2. Next, add Seaver's eye to the top right edge of the circle. Notice that his eyebrow extends above his head.
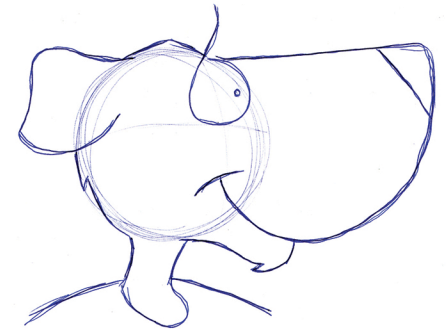

3. Now add Seaver's snout. His snout is a straight line on top that curves down to form his mouth.

4. Next, comes his ear and his cheek. Notice that the cheek follows the curve of the circle you first drew.

5. Now add his furry chin! You can also fill in the top of his head. Don't forget that the top of Seaver's head has a little point to it!

6. Finally, add Seaver's neck and shoulders.

CONGRATULATIONS!

You've drawn your very own Seaver!

Now get out there and draw him on everything! He won't mind.
